

Dear Mr. Wensberg:

We welcomed receiving your rather straightforward letter of July 11TH 1992. Your advice, had it come 10 years ago, would have saved us agonizing over the contradictions discovered in our researches. But it also might have meant not poring over all four volumes of Whiteback and Oswald in New Orleans. So some efforts are worth making!

¹⁴ You are best debunking others' speculations. However we have no sense of your position. How do you account for

the assassination of President Kennedy? Do you consider it successful (was killing Kennedy the only objective)? Did Oswald have any active knowing? involvement in the assassination? Did he co-operate with being a patsy? If he was so evasive how could anyone count on him not messing up? (like leaving town or yelling [not shooting] out of one of the Book Depository windows)? If Oswald was so politically-minded why wasn't he outside or otherwise observing (and being observed) the Presidential motorcade?

We know of your disgust

at being exploited by the Oliver Stones of this world and are familiar with your actions to make the public conscious of his total lack of integrity.

Indeed, we wish to offer an alternative - Right now we do not know and can not decide on the most effective method (drama, film, lectures, report) we write seeking your assistance.

You are good at pointing out obstacles and dangers. Still, after all your labors, thirty years have gone by and no-one has supplied substantive evidence, either of forensic, legal, or psychological nature, to prove who killed the President, how, why.

We want you to guide and direct us (what documents/people). People are ripe for the truth but they no longer are satisfied with who covered-up the truth and why. People, even though they are treating it like a murder mystery, merely would like (a) name [s] to hang the assassination on!! Can you provide clues/answers?

If you can, but are unwilling to, please say so. If not, tell us what you know!!!

Thank you,
Dr. R. Goldberg
